8	Game Objectives/Tasks	The game objectives are related to discover the persons next to us by answering the questions and guessing if the story of others is true or false. The players can gain points by guessing if the answer is T or F but also but lying so well that no one can be able to guess their story.
9	Rules/ Instructions	In this game every match is played between a player and the rest of the group. A participant takes a card with a question, after reading the question, she/he has also to choose a T or F card and depends on the choice known just by her/himself, he/she will answer to the questions. After the story, the group can discuss a bit their opinion but, in the end, they will vote for T or F. If the majority will guess if the story is T or F, just the persons who voted for right option will have a point. The storyteller won't receive any point. If the majority will choose the wrong option, just the storyteller receives the point. Win the person who gains firstly & points or the person who has more points at the end of the cards. The player can refuse to answer a question, but he/she will lose a point.
